

ABSTRACT OF THE DISCLOSURE

The invention relates to a dermo-cosmetic composition for pets. This composition comprises a diffusion solvent vehicle that enables, by a simple application to one or more points of the cutaneous surface, a diffusion over the entirety thereof and at the level of the sebaceous glands. The active ingredients, primarily consisting of a complex of essential oils and of polyunsaturated fatty acids, stored in these sebaceous glands can be salted out progressively with the sebum product to the surface of the skin.
